📍 Frankfurt am Main, Germany

🌐 [chenzhiwei-171](#)

Experience

Goethe University Frankfurt, Visiting Postdoctoral Researcher
Visiting postdoctoral researcher at the Institute for Theoretical Physics, supervised by Prof. Luciano Rezzolla.
Frankfurt am Main, Germany
Feb 2026 – present
6 months

- Relativistic astrophysics
- Binary neutron-star merger remnants
- Numerical relativity

National Astronomical Observatories, Chinese Academy of Sciences, Postdoctoral Researcher
Postdoctoral researcher working with Prof. Jifeng Liu and Prof. Youjun Lu.
Beijing, China
June 2025 – present
1 year 2 months

- Gravitational-wave astrophysics
- Compact binary populations
- Multi-messenger astronomy

Education

PhD **National Astronomical Observatories, Chinese Academy of Sciences**, Astrophysics
Beijing, China
Sept 2021 – June 2025

- Supervisor: Prof. Youjun Lu
- Outstanding Graduate of Beijing, 2025
- Zhuliyuehua Scholarship, 2024

Bachelor **University of Chinese Academy of Sciences**, Astronomy and Physics
Beijing, China
Sept 2017 – June 2021

- Outstanding Graduate of Beijing, 2021
- National Scholarship
- First Prize Scholarship

Teaching

Introduction to Modern Astrophysics: Teaching Assistant, University of Chinese Academy of Sciences, Spring 2025. Course coordinated by Prof. Youjun Lu and collaborators.

Advanced Astronomy: Teaching Assistant, University of Chinese Academy of Sciences, Fall 2021. Course coordinated by Prof. Jifeng Liu and collaborators.

Research Interests

- Gravitational-wave astrophysics and multi-messenger astronomy
- Binary neutron-star mergers and remnant stability
- Numerical relativity and relativistic stellar equilibria
- Strong gravitational lensing of gravitational waves
- Compact-binary populations and merger-rate studies
- Short gamma-ray bursts, extended emission, and merger-novae
- Tidal disruption events

Invited and Contributed Talks

The First Altay Time-Domain Astronomy Workshop: Invited Talk, Altay, China, August 2023. “On the Lensed TDE and BNS Merger-Nova Luminosity Function.”

Annual Meeting of the Division of Gravitation and Relativistic Astrophysics, Chinese Physical Society: Best Student Talk, Chongqing, China, May 2023. “Constraining the Origin of Stellar Binary Black Hole Mergers by Detections of Their Lensed Host Galaxies and Gravitational-Wave Signals.”

Gravitational Wave Astrophysics Conference 2021: Hefei, China, June 2021.

Awards

Outstanding Graduate of Beijing Beijing Municipal Commission of Education	Jan 2025
Zhuliyuehua Scholarship University of Chinese Academy of Sciences	Jan 2024
National Scholarship Ministry of Education of the People’s Republic of China	Jan 2023
Excellent Communist Youth League Member Chinese Academy of Sciences	Jan 2022
Outstanding Graduate of Beijing Beijing Municipal Commission of Education	Jan 2021
National Scholarship Ministry of Education of the People’s Republic of China	Jan 2019

Languages

Chinese: Native speaker
